|---|---|
| <i>Web development technologies / tools</i> | <ul style="list-style-type: none"> • LAMP, PHP, Python, HTML, CSS, XML, JSON. • JavaScript, jQuery, Backbone, Bootstrap. • Laravel, Drupal, Wordpress, phpBB, SugarCRM • MySQL (Server, Cluster & Replication, HA), MongoDB. • Linux / Apache: server configuration & administration. • Cloud: Rackspace, Amazon AWS, VPS, dedicated • Business Intelligence & applications integration: ETL + bespoke middleware. |
| <i>Other</i> | <ul style="list-style-type: none"> • Project Management, Agile, JIRA , SVN, Git, MVC, ETL, LDAP, WebEx, Pardot, SOAP/RESTful API |

Work Experience:

SEP13-NOW

WEBCODER SOLUTIONS LTD, CEO/PM + Senior web developer for SMART INSURANCE UK & SHINE! (B2B)

One of the main goals at Smart Insurance was to restructure their entire IT systems and rebuild crucial parts from scratch thereby provide robust and scalable solutions to meet future business requirements.

- General LAMP stack web back-end, front-end development, support & maintenance.
- APIs and web applications based on Laravel framework
- Dedicated/cloud servers setup, administration, advanced networking.
- Project managed for outsourced front-end design/development

OCT07-JAN12

WEBCODER SOLUTIONS LTD, CEO/PM + Senior web developer for Alfresco Software Limited, Senior web developer (-08 employee then B2B)

While working through my own LTD for Alfresco performed the full spectrum of Web-related tasks, including rapid prototyping, design and layout, graphics creation and user interface optimization, server-side programming (primarily PHP & MySQL databases), AJAX interactivity,

standards-compliant HTML, XML and CSS, troubleshooting, testing, training, ongoing updates and some aspects of Project Management.

Key responsibilities:

- Front/back-end web applications development, support & maintenance.
- Enterprise systems integration, API, middleware, ETL.
- Linux admin assistant for 20+ LAMP boxes running web apps.
- Project managed outsourced subcontractors.

One of my biggest achievements was development from scratch of a bespoke middleware platform. It integrated various Enterprise and Open Source applications ensuring uninterrupted flow of leads between front-end websites and integrated back-end systems owned by different departments/stakeholders. A built-in failover solution proved to work flawlessly in situations where other off-shelf products had failed.

Technologies / Tools: Linux (Apache/Tomcat), MySQL (replica), PHP, XHTML, HTML, CSS, JavaScript, AJAX, XSLT, XML, JSON, REST, ASP SugarCRM*, Eloqua*, Pardot*, Alfresco ECM/WCM*, phpBB, WordPress, JIRA, Forge, Git, SVN, MVC, WebEx* (* - including APIs)

MAR07 - JUL07 Brazilian Portuguese Podcast, PM / Senior web designer / developer

This project challenged all of so far gained skills in web design & development as well as allowed to acquire new ones in project management area.

The goal was to plan, design, develop an integrated and fully automated system allowing online sale of digital products.

Main responsibilities:

- Project management & consultancy.
- Plan & design front-end compliant with W3C & Gov section 508 accessibility/usability guidelines.
- Build integrated and fully automated back-end online system consisting of modules: user/admin login & user accounts management, bespoke CMS, advanced recurring PayPal subscriptions and payments for digital products sale, mailing lists.
- Other: sale increase through advanced SEO & ads campaigns.

Technologies / Tools: PHP, MySQL, JavaScript, XHTML, CSS, XSLT, XML, Wordpress, Linux, Apache

SEP05 - MAR07 Gov: Department for Constitutional Affairs (Justice), Web designer / developer

Working for the UK local Government in a web team consisting of 11 people.

The project's goal was to improve existing websites in order to make them compliant with the W3C as well as Government's guidelines simultaneously leading to its complete redesign and subsequent content migration.

Main responsibilities:

- Back-end code improvements to W3C & Gov section 508 accessibility/usability guidelines, new templates creation, guidelines for web developers & content editors that closely liaise with them.
- Assisted intranet developers on code improvements & content migration from static pages into RedDot CMS.
- Conducting assessments, UAT tests & advice on web accessibility/usability for existing & newly developed websites.
- Liaison with other departments & staff on different levels including CEOs.

Technologies / Tools: HTML, CSS, XSLT, XML, Reddot, UAT

AUG05 - SEP05	Diageo, Web developer / designer, webmaster
---------------	---

- Redesign & launch of a new global internet diageo.com
- Coordinated localization of the global site for Netherlands, Denmark & Poland
- Accessibility & usability improvements / advice to existing websites
- Carried out User Acceptance & regression Tests
- Imagery creation in Photoshop
- CMS staff training

Technologies / Tools: HTML, CSS, UAT, Microsoft CMS, Photoshop

APR04 - FEB05	Gov: Office of Communications, Webmaster / Web developer
---------------	--

SEP02 - APR04	Gov: Office of the Deputy Prime Minister, Intranet designer/manager
---------------	---

2001-2002	Gov: Department for Transport, Administrative Officer / IT support
-----------	--
